Family History Sources in the Palmetto State

South Carolina History

South Carolina was one of the original 13 colonies; it was the first state to secede from the Union and one of the first to rejoin the Union. First explored in the 1500s by the Spanish and French, it was also later settled by the English, Dutch and Scots-Irish.

In 1497 John Cabot claimed South Carolina for King Henry VII, but it wasn't until March 1670 that settlers finally landed in what is now called Bull's Bay and permanent settlement began.

Charles Town, settled in 1680, and renamed Charleston in 1783, was one of the first pre-planned towns in North America and was the capital of the state until 1783. The capitol was moved to Columbia in 1783.

Following the election of Abraham Lincoln, South Carolina was the first state to secede and the first to ratify the Constitution of the Confederate States of America. The first shots of the Civil War were fired as the Union ship "Star of the West" tried to reinforce Fort Sumter.

In 1865, General William Tecumseh Sherman's troops cut a swath through South Carolina, leaving a path of destruction in their wake and burning the capital city of Columbia.

After the Civil War, the economy of South Carolina was destroyed and the state remained one of the poorest in the nation for over a century. Most people worked as farmers. Many were sharecroppers and tenants on large farms owned by the wealthier land owners in the state.

Around 1950, the importance of cotton diminished in the state as more textile factories and other industry moved in.

South Carolina is known as the Palmetto State after its state tree. The tree was added to its state flag when it seceded in 1861.

Counties of South Carolina

South Carolina Censuses

Federal censuses for South Carolina begin in 1790 and are mostly complete, although the Richland District is missing for the 1800 census. The 1850 census of York and Lexington districts indicates county of birth as well as state for each person.

Although South Carolina did not conduct any full colonial censuses, fragments of state census returns are available at the South Carolina Department of Archives and History. These include the 1829 state census of Fairfield and Laurens districts, and the 1839 state census of Kershaw and Chesterfield districts.

The population returns for the 1869 state census are complete except for Clarendon, Oconee, and Spartanburg counties. The 1875 state census returns are available for Clarendon, Newberry, and Marlboro Counties, as are partial returns for Abbeville, Beaufort, Fairfield, Lancaster, and Sumter counties. The original returns are found at the South Carolina Department of Archives and History.
